Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)				
Office Action Comments	10/597,881	GERCKE ET AL.				
Office Action Summary	Examiner	Art Unit				
	KAREN AMORES	3616				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Applicant is advised of possible benefits under 35 U.S.C. 119(a)-(d), wherein an application for patent filed in the United States may be entitled to the benefit of the filing date of

a prior application filed in a foreign country.

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers

have been placed of record in the file.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the peripheral collar of the steering knuckle and the collar of the bearing journal must be shown and labeled or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Application/Control Number: 10/597,881 Page 3

Art Unit: 3616

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

objection to the drawings will not be held in abeyance.

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 5. Claims 1 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for
- failing to particularly point out and distinctly claim the subject matter which applicant regards as

the invention.

6. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for

omitting essential structural cooperative relationships of elements, such omission amounting to a

gap between the necessary structural connections. See MPEP § 2172.01. The claim states the

limitation "a pivotable connection between said joint fork and said steering knuckle two

mounting points axially aligned with one with one of said two mounting points having a toroidal

roller bearing". Essential structural relationship is missing. For the purposes of applying an art

rejection, the Office assumes a pivotal connection between the joint fork and steering knuckle at

one of two mounting points, one of which has a toroidal roller bearing.

7. Claim 7 recites the limitation "said bearing outer ring" in line 5. There is insufficient

antecedent basis for this limitation in the claim.

Application/Control Number: 10/597,881 Page 4

Art Unit: 3616

8. Claim 7 recites the limitation "said bearing inner ring" in lines 5 and 6. There is insufficient antecedent basis for this limitation in the claim.

9. Claim 8 recites the limitation "said collar of said bearing journal" in line 5. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 11. Claims 1 8, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Littman, U.S. 6,010,272 ("Littman"). Littman discloses a wheel guide joint arrangement, for a driven axle of a motor vehicle, the joint arrangement comprising:
- 12. a joint fork (14), which can be arranged at a vehicle axle (34) or at a wheel carrier;
- 13. a steering knuckle carrying a wheel bearing (column 1, line 14); and
- 14. a pivotable connection (100) between said joint fork and said steering knuckle at two mounting points which are axially aligned; one of said two mounting points having a toroidal roller bearing (column 1, line 38).
- 15. In reference to claims 2 8, Littman further discloses one of said two mounting points has a ball and socket joint (fig. 1); wherein said toroidal roller bearing is arranged in a pot-shaped recess (60) of said joint fork or of said steering knuckle; wherein said pot-shaped recess of said joint fork or of said steering knuckle has a peripheral collar (64 or 66) in the area of the

Art Unit: 3616

bottom of said recess; an elastic body (140) arranged between an outer ring (130) of said toroidal roller bearing and an essentially cylindrical wall (63) of said pot-shaped recess; wherein said elastic body is a ring (144) with an essentially circular cross section (fig. 1); wherein said toroidal roller bearing is covered with a seal (140) on the side facing away from the bottom of said pot-shaped recess, wherein said seal seals both the rolling bodies of said toroidal roller bearing and a gap between said bearing outer ring and said pot-shaped recess and another gap between said bearing inner ring and said bearing journal against environmental effects (fig. 2); and wherein said seal has a first edge (146) or lip as well as a second edge or lip in the area of an inner circumference adjacent to said another gap, wherein said seal is supported with the first edge radially at said bearing journal and with said second edge axially at said collar of said bearing journal (fig. 2).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to KAREN AMORES whose telephone number is (571)272-6212. The examiner can normally be reached on Monday through Friday, 8:00 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Q. Nguyen can be reached on (571)-272-6952. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished
